I. INTRODUCTION AND BACKGROUND

This document is a template derived from the standard IEEE style template for papers and transactions (<http://www.ieee.org/web/publications/authors/transjnl/index.html>). The template is for Microsoft *Word* versions 6.0 or later.

This template should be used for abstract submissions to the 4th International Conference on Low Temperature Bonding for 3D Integration or LTB-3D 2014 to be held from July 15-16, 2014, at The University of Tokyo, Japan. Please refer to the conference website for details, including registration and final paper submission information: <http://www.3dwb.org/>

The length limit for abstract submissions is one page for all contributed papers, including both oral and poster presentations. Abstracts should be submitted in pdf format. Please do not password protect your PDF file. Please, do not number your pages.

Figures: Format and save your graphic images using a suitable graphics processing program that will allow you to save the images as a jpeg file, for example, and then insert the figure inline with the text using the *Insert→Picture→From-File* menu.

A conclusion section is not required.

II. RESULTS

This section describes the results¹. This section describes the

Fig. 1. Magnetization as a function of applied field. Note that “Fig.” is abbreviated. There is a period after the figure number, followed by two spaces. It is good practice to explain the significance of the figure in the caption.

ACKNOWLEDGMENT

The preferred spelling of the word “acknowledgment” in American English is without an “e” after the “g.” Use the singular heading even if you have many acknowledgments.
